

Public Print Cloud Solutions

Enabling Print/Copy/Scan and Mobile Access

Help grow your business, attract new customers and expand customer services by providing geo-located and branded services for secure public printing worldwide. Enable pay at device¹. or pay with mobile device attracting tourists, sales staff, professional drivers to easily print content from virtually anywhere and at any time!

Convenient for customers and good for business

Mobility is transforming the way people live, work and play. Drive new revenue opportunities by offering customers the convenience of complimentary or pay-for-use secure print services with ePRINTit™.

ePRINTit™ helps you provide highly secure public and guest printing and payment services. Easily deploy and scale this cloud-based solution without the cost of print servers, storage and print driver management.

ePRINTit™ enables customized branding, analytics, and hyper-targeted marketing for your customers via a suite of mobile and desktop applications providing geo-location, payment, and account management services. Users simply upload from any connected cloud account and instantly the closest available branded locations appear for them. Alternatively, users can just email your own branded email address @eprintitservice.com and users receive an 8-digit secure code release to enter at printer.

Incredibly, the ePRINTit solution combines all printers and locations to a single touchpoint for each Partner or Organization. No Print Drivers or Print Servers to manage. Unlike the competition, documents are processed into highly optimized and compressed print ready files in the cloud and delivered only when the customer arrives and releases their encrypted file. Full job selection and print options available on the release station.

Safeguard printing services for mobile users

With ePRINTit™, consumers get a cloud-based service that employs end-to-end encryption and is available virtually anywhere. Bridge the gap between mobile devices and networked printers, enabling mobile travelers to stay connected wherever they maybe be.

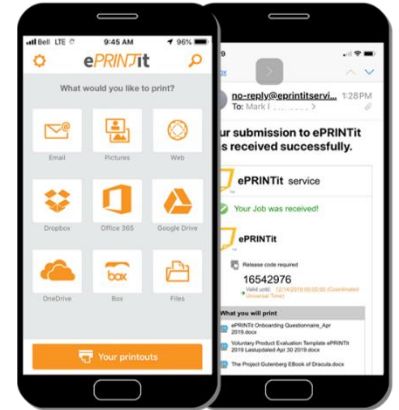

Users select content on their mobile device and send it for printing either by email direct to a Partner created email address or by using the ePRINTit Public Print Mobile App. The print job is then encrypted and stored in a secure locker. When customer arrives, then enter the 8-digit encryption key release code at the device, review each document, select print options for each document, review cost, agree, pay using their credit or debit facility and then print.

Documents are stored using 256bit Sha-2 Encryption. Designed by the National Security Agency (NSA) and the standard method of encryption for the Federal Information Process Standards (FIPS). Transport delivery is using TLS 1.2. Both secure and reliable (no attacker can modify the communications during the negotiation without being detected).

All documents are completed destroyed after a set period indicated in the Mobile APP with a set expiry date. Partners determine this period-of-time (typically 1-7 days). Secure data storage is available in 140 countries, with over 40 data centers utilizing the Microsoft Azure Cloud Network.

ePRINTit mobile app for public printing

ePRINTit Mobile app for Public printing provides a private portal, which allows for printing, and managing the cloud e-PORTAL documents.

Self-Service Kiosk

Customer benefits

- Convenient 24/7 printer access
- Top level data security for peace of mind
- Complete mobility with any web connected or mobile device
- Ideal for Pay for use or Campus Solutions. This solution includes print shops, business centers, education (K-12 & Higher Ed)

Turn existing printer into a retail ready device

Public printing has never been so easy! Simply download the Public Printing Interface to a supported printer, or to an all-in-one PC attached to any default printer or MFP, enable the print options you want, and provide printing, scanning and copying using a partner-assigned email address or the ePRINTit™ Mobile App.

Verticals focus

Draw in customers and engage them in mobile marketing and convenient pay-for-use printing. ePRINTit™ enables an easy to use solution with payment capabilities for coffee shops, convenience stores, libraries, boardrooms, condo towers, vacation rentals, and more!

Hospitality, Convenience Stores, Libraries and Rest Stops

ePRINTit™ is the perfect solution for semi-attended environments where a customer associate is available to assist. For example, thousands of 24-hour convenience and gas station stores as well as the mega-chain coffee shops worldwide. Regular customers and visitors alike regularly need to print important documents and appreciate the convenience and flexibility.

Enable a fully unattended solution

Need a 24/7 unattended print solution for your print shop? Fully integrated kiosks which include printers, connectivity and payment modules in various configurations are available for deployment. You can even use your own current kiosk solution (windows based) and simply use our SaaS solution. Many additional features are added to the ePRINTit Kiosk solution available in embedded select printers as well as self-contained metal Kiosks

Add Guest Printing to our Educational and Enterprise Solution

Perfect solution for any account managed organization that wants to take advantage of providing print/Scan/Copy services from a paid mobile account, almost eliminating the cost of credit card transaction costs and professionally managing your busy clients. Kiosk versions, or touchscreen computers or tablets connected to any printer provide a custom user experience. Perfect industries for libraries, Internet shops, and retail.

Embedded Printers and PC

- Drive revenue and foot traffic
- Enhance brand name
- Increase customer satisfaction.

Software available for any Windows PC/Touchscreen attached to any printer or HP OXP imbedded printers.

Perfect vertical: Education

ePRINTit™ provides a single platform that enables the public and account holders to access the same print devices. Account holders and students can print from any device, manage their own funds, quotas, and print workflows.

Guests can access the Public Printing Cloud and Account holders access their private accounts. Waste is minimized through secure job release with authentication at the printer. A self-service multi-function device available

24/7, connecting web-enabled devices with school technologies anywhere.
