

THE ePRINTit™ PUBLIC PRINTING SERVICE INSTALLED ON ePRINTit™ KIOSK STATION

ePRINTit™ is recognized as a global leader for our development of Public Print and Higher Education Solutions. In today's mobile world, ePRINTit™ is revolutionizing the way its customers *live, work and play on-the-go™*. Be a part of the solution and change the way we print in a shared economy, all while leveraging your brand and revenue opportunities.

New capabilities in self-service

Cloud-based printing sent to ePRINTit™ Kiosks enables seamless mobile transactions that are independent, fast, easy and accessible 24/7. Create a marketplace and connect people who need to print with pay for print or account managed print.

Adaptable for all service areas and businesses

Ideal for print and copy shops, libraries, education institutions, large dormitories, hospitality, hotels, business centers, convention centers, airport lounges, Internet shops and retail.

Turnkey solution

ePRINTit™ brands, installs, monitors and supports all Kiosk solutions. All Kiosk printers and payment modules are available in various configurations and the stand-alone print solution includes complete service support, remote service and monitoring, and leasing options.

Easy for people to discover and use

Your business location will be geolocated and branded for your company on ePRINTit™ Mobile and desktop solutions (so customers looking for a place to print can find convenient locations around the world).

An Omni-Channel solution for your business

To further leverage your brand, ePRINTit™ will customize your Kiosk body and touch screens with online flyers, today's specials, in-store couponing and promotions. Businesses can also integrate their loyalty programs (event promotions, tickets) and loyalty services (status, redemption) with the solution.

Cater to your customers and optimize their experience

Customers select content from almost any device and the print job is then encrypted, processed and sent to a supported Kiosk printer. The stand-alone Kiosk solution is monitored by ePRINTit 24/7. With a plug and play setup, the system is connected wirelessly with virtually no IT support required.

PRODUCT INFORMATION

Custom designed and built printing kiosk software for education and retail using cloud-based mobile public printing service and Payment Services Software and monthly cloud document processing service.
